WasteWizer Technologies

# *Stop Waiting for Weight*
How BinBar Works

**Dispatcher adds container** to the WasteWizer Dashboard

Hauler installs BinBar during container drop-off
60 second install

BinBar begins **monitoring weight & location** of container
2 month battery life, rechargeable and user-serviceable*

Dispatcher monitors dashboard and assigns a driver as container approaches maximum weight
Weight syncs every 30 minutes**

Hauler arrives and **pulls container at target-weight**

*Battery life is dependent on environmental conditions, BinBar configuration, battery health, etc.
**Sync frequency is dependent on cellular quality and strength
